

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A wet wipes dispensing system comprising:
  - a plurality of separably joined wet wipes, the plurality of separably joined wet wipes comprising a lubricant;
  - a dispenser comprising a sealed chamber, the sealed chamber housing the plurality of separably joined wet wipes therein; and
  - the dispenser comprising a flexible elastic sealing orifice through which wet wipes from the plurality of separably joined wet wipes can be dispensed from the sealed chamber wherein at least a portion of the lubricant is automatically transferable to the flexible elastic sealing orifice when wet wipes from the plurality of separably joined wet wipes are dispensed from the sealed chamber through the flexible elastic sealing orifice whereby a drag relationship between the wet wipes and the flexible elastic sealing orifice is reduced by at least about 20% when compared to wet wipes not containing a lubricant dispensed from the dispenser.
2. (Original) The wet wipes dispensing system of claim 1 wherein the lubricant is non-volatile.
3. (Original) The wet wipes dispensing system of claim 1 wherein the lubricant adsorbs to the flexible elastic sealing orifice.
4. (Original) The wet wipes dispensing system of claim 1 wherein the lubricant is water immiscible.
5. (Original) The wet wipes dispensing system of claim 1 wherein the plurality of wet wipes comprise a roll of wet wipes.
6. (Original) The wet wipes dispensing system of claim 1 wherein the drag relationship between the wet wipes and the flexible elastic sealing orifice is reduced by at least about 30%.

7. (Original) The wet wipes dispensing system of claim 1 wherein the drag relationship between the wet wipes and the flexible elastic sealing orifice is reduced by at least about 40%.
8. (Original) The wet wipes dispensing system of claim 1 wherein the drag relationship between the wet wipes and the flexible elastic sealing orifice is reduced by at least about 50%.
9. (Original) The wet wipes dispensing system of claim 1 wherein the drag relationship between the wet wipes and the flexible elastic sealing orifice is reduced by at least about 60%.
10. (Original) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a space no greater than about 3 mm through which the wet wipes are dispensed.
11. (Original) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a space no greater than about 2 mm through which the wet wipes are dispensed.
12. (Original) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a space no greater than about 1 mm through which the wet wipes are dispensed.
13. (Original) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a space no greater than about 0.5 mm through which the wet wipes are dispensed.
14. (Original) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a space no greater than about 0.25 mm through which the wet wipes are dispensed.
15. (Original) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a space about 0 mm through which the wet wipes are dispensed.

16. (Currently Amended) A system for dispensing a plurality of wet wipes upon a single occasion comprising:

a roll of a plurality of separably joined wet wipes moistened with a solution containing a lubricant; and

a dispenser housing the roll therein and comprising a flexible elastic sealing orifice through which a plurality of wet wipes of the roll can be dispensed upon a single occasion from the dispenser wherein dispensing the plurality of wet wipes through the flexible elastic sealing orifice automatically lubricates the flexible elastic sealing orifice with the lubricant and whereby a drag relationship between the plurality of wet wipes and the flexible elastic sealing orifice is reduced by at least about 20% when compared to wet wipes not containing a lubricant dispensed from the dispenser.

17. (Original) The system of claim 16 wherein the lubricant is non-volatile.

18. (Original) The system of claim 16 wherein the lubricant adsorbs to the flexible elastic sealing orifice.

19. (Original) The system of claim 16 wherein the lubricant is water immiscible.

20. (Original) The system of claim 16 wherein the drag relationship between the plurality of wet wipes and the flexible elastic sealing orifice is reduced by at least about 30%.

21. (Original) The system of claim 16 wherein the drag relationship between the plurality of wet wipes and the flexible elastic sealing orifice is reduced by at least about 40%.

22. (Original) The system of claim 16 wherein the drag relationship between the plurality of wet wipes and the flexible elastic sealing orifice is reduced by at least about 50%.

23. (Original) The system of claim 16 wherein the drag relationship between the plurality of wet wipes and the flexible elastic sealing orifice is reduced by at least about 60%.

24. (Original) The system of claim 16 wherein the flexible elastic sealing orifice comprises a space no greater than about 3 mm through which the wet wipes are dispensed.

25. (Original) The system of claim 16 wherein the flexible elastic sealing orifice comprises a space no greater than about 2 mm through which the wet wipes are dispensed.

26. (Original) The system of claim 16 wherein the flexible elastic sealing orifice comprises a space no greater than about 1 mm through which the wet wipes are dispensed.

27. (Original) The system of claim 16 wherein the flexible elastic sealing orifice comprises a space no greater than about 0.5 mm through which the wet wipes are dispensed.

28. (Original) The system of claim 16 wherein the flexible elastic sealing orifice comprises a space no greater than about 0.25 mm through which the wet wipes are dispensed.

29. - 37. (Canceled)

38. (New) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a wiper blade adjacent a portion of the dispenser and the plurality of separately joined wipes pass between the wiper blade and the adjacent portion.

39. (New) The wet wipes dispensing system of claim 1 wherein the flexible elastic sealing orifice comprises a flexible sheet having a continuous slit.

40. (New) The wet wipes dispensing system of claim 1, 5, 6, 7, 10, 14, 38, or 39 wherein the lubricant comprises silicone.
